

Wedding Information Sheet

All of our wedding videography is done using high-definition, 3 CCD digital video cameras in widescreen format. Final products are edited using state-of-the-art software. We have two packages to choose from; with each, we will come to the rehearsal, arrive early on the day of the event, and stay for the entire length of the reception without time constraints. We never double-book; yours will be the only wedding shot on the special day and will be handled in all aspects by company owner John Bennardo.

Silver package - \$1,750*
